

Day 6 - Deployment Preparation and Staging Environment Setup

Deployment Information:

- **Platform:** Vercel
- **GitHub Repository:** <https://github.com/TayyabAli92/Nike-Shoes-Fully-Functionally-website>
- **Staging Environment:** <https://nike-shoes-topaz-seven.vercel.app/>

Environment Setup Process

1. Hosting Platform Configuration:

Chosen hosting service: Vercel.

Linked the GitHub repository with Vercel.

Set up build configurations and added environment variables for a secure deployment.

2. Environment Variables Configuration:

- Created a `.env` file containing the following variables:
 - `NEXT_PUBLIC_SANITY_PROJECT_ID`: Identifier for the Sanity project.
 - `NEXT_PUBLIC_SANITY_DATASET`: Name of the production dataset.
 - `API_KEY`: Authentication key for third-party services.
- Securely uploaded the environment variables to Vercel.

	NEXT_PUBLIC_SANITY_PROJECT_ID All Environments		Added 7h ago 	...
	NEXT_PUBLIC_SANITY_DATASET All Environments		Added 7h ago 	...
	SANOTY_API_TOKEN All Environments		Added 7h ago 	...

Staging Deployment:

- Successfully deployed the application to the staging environment.
- Ensured the build process completed without errors.
- Confirmed that the site loaded properly and functioned as expected.

```
C:\Users\Dell\Desktop\fully-functionally-e-commerce>npm run build

> template-3@0.1.0 build
> next build

  ▲ Next.js 15.0.4
  - Environments: .env.local

  Creating an optimized production build ...
  ✓ Compiled successfully
    100% 100%

  ✓ Linting and checking validity of types
  ✓ Collecting page data
  ✓ Generating static pages (12/12)
  ✓ Collecting build traces
  ✓ Finalizing page optimization

f (Dynamic) server-rendered on demand
```

Performance Evaluation Report

1. Desktop Performance:

The application was tested on desktop devices to evaluate loading speed, responsiveness, and overall performance. Metrics such as render time, interactivity, and resource utilization were analyzed to ensure optimal functionality.

2. . Mobile Performance:

The application's performance on mobile devices was assessed, ensuring smooth navigation, fast load times, and responsiveness. Key metrics such as page speed, interaction delays, and visual stability were analyzed to optimize user experience.
